EDITORIAL

I hope everyone had a good Christmas and they all got the presents they had asked for. For me it went very quickly and was extremely hot, well it normally is this time of year in South Africa.

Anyway down to business. Firstly and most importantly this years trials are already underway and the first RTVT is coming up soon at Stainby. Nobody came forward to be C-o-C and had it not been for Eddie and Mick Wing who volunteered to do it then it would have been cancelled. As permits need to be applied for in advance please step forward and have a word with Pete to get your name down for a future event.

Also just a reminder that if you haven't renewed your membership then this will be your last magazine so please contact Jayne. For those of you that have already renewed the new ALRC Handbooks are now available from Jayne or Simone so please collect yours as club night or at any event.

Easter will soon come around as well and Viv has provisionally booked 10 pitches at Fforest Field Caravan Park in Builth Wells, Wales for us so get your names and a £20 deposit to her ASAP, only seven places left. She needs to know by 3rd February (club night).

Lastly don't forget the ALRC National Rally in May, the club is running the CCVT so we are looking for as many helpers and marshals as possible so get your booking forms sent in. They are available from Simone or at www.alrc.co.uk

It's been a little hectic since the last magazine as Simone and myself spent Christmas in South Africa with my sister.

We travelled up to the Kruger Park and spent four days with the wild animals. (Just like being at home really).

Anyway I saw several examples of 110's that had had an angle grinder taken to them and viewing seats fitted. I thought that would be a good idea for me to do with the Discovery but then remembered what happened last time I had a large angle grinder in my hand so I shan't bother.

Also whilst on route to the Kruger we stopped off at a small farm where the owner had hand reared a hippopotamus from a tiny baby. This hippo was supposedly tame and could be hand fed and stroked.

“Yeah, right!” I thought but the owner was most insistent that this animal, one of the most dangerous on the planet was very friendly.

I must admit when I first walked up to it I was more than a little apprehensive, but true to his word “Jessica” was very friendly.

She was only a youngster at eight years old and only weighed one tonne!

Having fed her and stroked her I was asked by the gentleman there if I wanted to give her a kiss.

Well I've kissed some things in my time but I do draw the line at hippos.

Anyway he was very impressed with my

knowledge of hippos in general and I explained I had known one for years and Helen was fully grown!

Til next month

TRIALERS, TRAILERS AND TECHNICAL HITCHES

I'm putting pen to paper because of a worrying trend that has started to develop in certain circles of our CCVT community. Namely trying to get the trialer off the trailer via an unknown front exit other than the standard rear.

Now call me boring but I'm one of the people who try to do things the easy way, like backing my trialer down the ramp provided by the trailer manufacturer when off loading said vehicle.

However there seems to be a secret "cult organisation who prefer to try and get their vehicles over the front of the trailer. I don't know why they do it and all their reasoning is fundamentally flawed but still they persist.

There seems to be a bit of a pattern emerging and it seems to date the only known cult members actually inhabit the Northampton region.

Firstly Steven Duddy tried to get his fathers trialer over the front of the trailer but succeeded only in impaling it on the jockey wheel.

On Sunday I witnessed Don Randall actually try the same trick. He failed luckily and only managed to get it stuck on the trailer spare wheel but he had a determined effort.

So my advice to club members is to be on your guard when standing around our Northants sub-section members and don't stand in front of their trailers even if they appear to be doing things in a normal Leicestershire way.

Also a special watch should be carried out on Adam Coles as he is the only south of the border person yet to display these traits.

You have been warned.

A UFO TRASHED MY CAR...

Following recent news stories about a **UFO allegedly wrecking a wind turbine**, specialist car insurance broker Adrian Flux had a call from a curious customer asking what would happen if a UFO crashed into his car. Which got the Flux boffins thinking about what bizarre accidents were or weren't covered.

Amongst the potential disasters that are covered by normal car insurance schemes, assuming the driver has a comprehensive policy, are:

- Monkeys wrecking the car on a drive through a safari park.
- A block of frozen urine dropping from the sky and striking the car.
- Ditto a meteor.
- Crashing into a grand piano left on a hairpin bend of an Alpine pass (this one assumes the insurance includes European cover).
- A kangaroo, on the hop from the local zoo, jumping over the car and wrecking the roof en route.
- A mastermind criminal, operating from a satellite in geostationary orbit, holding the city council to ransom by taking over the traffic lights and causing gridlock in the streets, during which chaos the car is smashed.
- A UFO crashing into the car.

However, if the UFO causes an accident by attacking the car, with, say, a photon torpedo, then that would be considered an act of war, and thus would not be covered. Similarly, if an intergalactic war led to Armageddon and resulted in the car being damaged, it would not be covered.

"It gets more complicated if a UFO hits a wind turbine, causing a rotor blade to shear off which then crashes into the car," says Gerry Bucke of Adrian Flux Insurance Services. "In that case, the car driver's best hope is that the UFO pilot's policy is completely up to date, as it would be simplest to make a claim on the alien's insurance. Otherwise there may be arguments as to who is responsible for the damage to the car.... In the worst case scenario, though, the car would be covered by our policy – it's just that a claim on it would affect the driver's No Claims Bonus."

On a comprehensive car policy most events and accidents will be covered. Amongst the few that aren't are wars, uprisings and the end of the world.

CHRIS'S CHIT CHAT

Here we go again, 2009 is upon us, and the first trial of the year has just been held at Eaton Lodge.

Today was one of those days when you feel sorry for the C-o-C. Andy and Brian had laid out some great sections on the newly re-modelled Eaton, and I am sure they were great fun to drive last weekend when they were laid out. But unless you were in some foreign climes, I am sure you will be aware that Saturday provided us with some quite extreme weather, and the newly re-modelled ground acted a bit like a sponge, and soaked up all that lovely rain that we were treated to overnight; and so come the morning, the sections that had been laid out were more challenging than was intended.

But as the saying goes "that's trialling" and although the sections were harder, it was the same for everyone that entered, and it was a fair fight so to speak. Thanks to Andy and Brian for doing such a good job in quite extreme circumstances.

I am not going into a blow-by-blow account; I will let the score's speak for themselves. But I must mention the fact that Donald let me have a drive in his new motor for the first time, and there were only 2 people in front of me on the scorecard at the end of the day. (Big thanks Don)

Now other stuff to mention must include the Nationals. Don't forget we will be looking for loads of help in May, so that we can run an event that people will remember for all the right reasons. Talking of running events, "**YOUR CLUB NEEDS YOU**" don't forget to speak to Pete about officiating at an event: we came very close to cancelling the first RTV of the year because we did not have a volunteer to be COC. So please don't be shy, your offer of help will be greatly appreciated and supported.

Last but not least is the forthcoming AGM. We are always going to welcome anyone that wishes to get involved with the running of the club. So if this is you, then talk to a committee member so that we can get you nominated at the AGM.

That's about it for this month, but if you are wondering about Christmas; it was fine thanks, the dogs behaved, the wife didn't shoot either of them; as for me, I am still in the doghouse, but what's new.

Chris

SALES & WANTED

FOR SALE this month:

Ifor Williams aluminium top to fit a 110 double-cab or 88" truck cab. Fairly good used condition, with fixings but no tailgate. Will also fit onto a 90 truck cab but it's about 4" shorter than the tub. I bought it to modify it to fit on a small trailer, but lost interest when I realised how complicated that would be!

Two as-new 205 R16 tyres on rims. About 12mm of offroad/compromise tread patterns. Good for winter / spare / trailer or to complete a set. One is a Dunlop Super Gripper on a Disco 1 steel rim & the other a Trayal T-70 on a standard Series rim. Can remove from rims if you only want the tyre(s).

Front radius arms for late RR Classic / Defender with blue genuine polybushes fitted. Very little road mileage and about a season of RTVT's from new.

Series 1 starter motor from 2 litre.

and WANTED:

Disco1 300 tdi drag link tube

Set of four 235/70 mud tyres (not Grizzly Claws – can't live with them on the road! Poss swap my Grizzly's for whatever you've got?)

One rear prop stand for a Sankey trailer

Series 2/2A/3 clutch pedal box

Any Series handbrake lever with ratchet

Please email steve.limb@ntlworld.com or call 07778 673909 anytime. Can deliver to clubnights or events, or you can collect from Melton

IF MY BODY WERE A CAR....

If my body were a car, this is the time I would be thinking about trading it in for a newer model. I've got bumps and dents and scratches in my finish and my paint job is getting a little dull ... But that's not the worst of it.

My headlights are out of focus and it's especially hard to see things up close

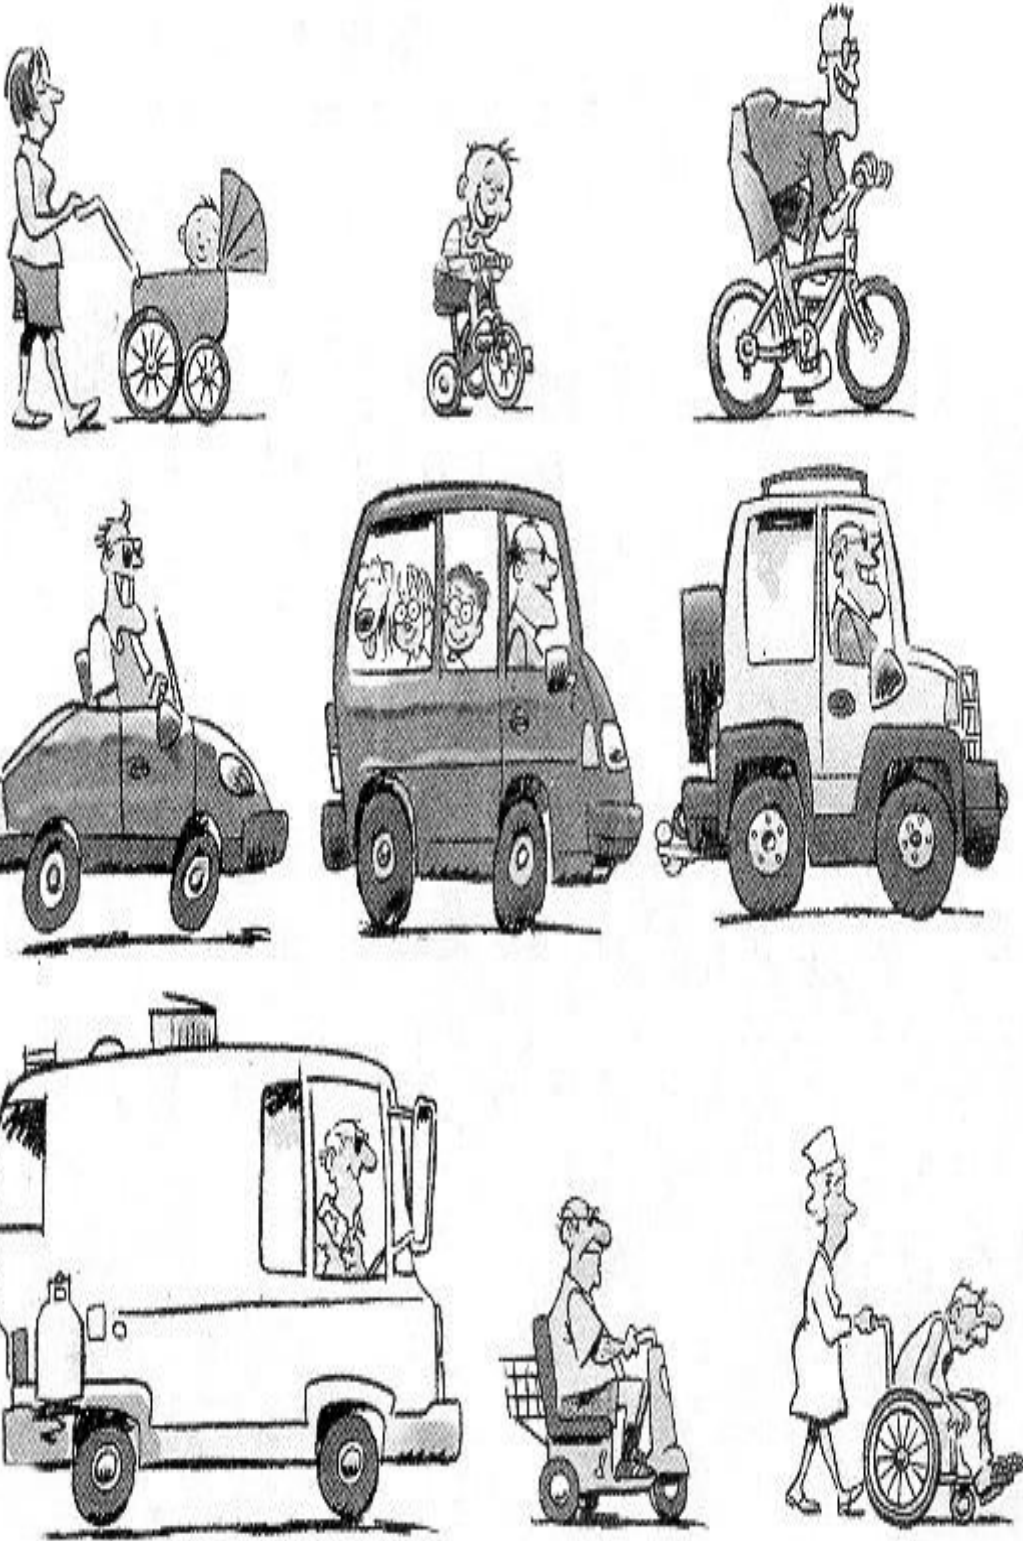

My traction is not as graceful as it once was. I slip and slide and skid and bump into things even in the best of weather.

My whitewalls are stained with varicose veins.

It takes me hours to reach my maximum speed. My fuel burns inefficiently. But here's the worst of it --

Almost every time I sneeze, cough or sputter ..either my radiator leaks or my exhaust backfires!
